

1. Prior to arriving at the festival, take your wristband out of the plastic sleeve.

2. Place wristband over your right wrist.

3. Get a friend to help.
Place your index finger between your wrist and the wristband. This will ensure it's not too tight.
Friend: hold the very end of the strap with one hand, and using the other, slide the black plastic clasp upwards to fasten.

4. Don't tamper, trip the strap, try remove etc. etc. Wristband is waterproof.
